REMARKS

25X1X

1. The following air activity and aircraft were observed at Merseburg airfield between 5 and 12 July 1953:

5 July. There was no air activity in cloudy weather.

6 July. Between 8 a.m. and 4 p.m., individual flights were made by MiG-15s. [REDACTED] The sky was 2/10 overcast. Night flying was practiced between 8:10 p.m. and 3 a.m.

25X1

9 July. Between 8 a.m. and 4 p.m., individual flights were made. There was a closed ceiling. Night flying was practiced from 8:15 p.m. until after midnight.

10 July. There was a closed ceiling at an altitude of 1,000 meters and good visibility. Between noon and 3 p.m. and again between 3 p.m. and 8:15 p.m., individual flights were made.

25X1

25X1

12 July. There was no air activity in cloudless weather. Every morning at 5:30 a.m. on 7, 8 and 9 July, a Po-2 plane took off from the field and climbed to an altitude of 700 to 800 meters from where it released a parachutist. The jumper climbed from the front seat to the lower portion of the left wing, then leaped head foremost. The parachute opened exactly 4 seconds after the leap. Immediately after the descent, the plane landed and took up another parachutist. Five or six such flights were made. In early July, four groups of 8 planes each were still parked on the dispersal area for MiG-15s.¹

2. In early July, no AA guns were observed at the field, although personnel with red-bordered black epaulets were still stationed there.²
